Subject: St. Martin Parish - commercial burning of trees and logs

EXTERNAL EMAIL: Please do not click on links or attachments unless you know the content is safe.

Dear Mr. Johnston,

I'm the Parish Attorney for St. Martin Parish.

We have a problem with commercial operations who have purchased a piece of raw land and are hauling in and then burning logs and trees on that property.

We're going to make that illegal (absent a state DEQ permit) next month, but in the meantime, is that legal under the DEQ Air Quality regs (or any other DEQ regs)??

If it's not legal, to whom would we address a complaint?

please advise
